

Chiara GUIDI

Ghent University Chiara obtained her PhD in Bioscience Engineering in 2021 at the Centre for Synthetic Biology (Ghent University). Her research results have been presented at different national and international conferences. So far, she is co-author of several peer-reviewed articles and a patent application based on her results. After her PhD, she started as a postdoctoral researcher funded by the Flemish government. Convinced by the market potential of her research, she started discovering the entrepreneurial world. In the past year, Chiara was selected to participate in two start-up programs: Expedition DO (Ghent University) and the Seedbed program of EIT Food. Fueled by intensive coaching and an elaborated market discovery route, Chiara is planning to translate this research into the spinoff B-COS.
